SUMMARY

Frontend Engineer specializing in React and Next.js ecosystems. Experienced in architecting complex frontend systems for government-scale projects , with a proven track record of leading development teams to deliver scalable, award-winning applications.

PROFESSIONAL EXPERIENCE

UWORK - Frontend Team Lead

June 2025 - Present

As a Frontend Team Lead, I oversee the development lifecycle by managing GitHub workflows, conducting technical interviews, and leading Daily Scrums via ClickUp to align engineering with business logic. I ensure high-quality delivery by performing thorough code reviews and personally resolving major technical bottlenecks to maintain architectural excellence.

AISTGroup - Frontend Developer

April 2024 - Present

Progressed from Intern to Middle Frontend Developer at AISTGroup, delivering the IDDA award-winning E-AHIK alongside E-Keyfiyyet, E-Reqabet, and the AHIK Internal Registry using Next.js and TypeScript. I also architected the Partner Integration System, Education Workers Registry, and Refugee Committee portal, while successfully migrating the E-TTKF bank module from Angular to React.

Azercosmos - Frontend Developer

April 2024 - June 2024

As a Frontend Intern, I implemented responsive designs and authentication systems while mastering modern libraries and collaborative workflows to deliver tasks under deadlines and establish a solid professional foundation.

ABB Tech - Frontend Developer

August 2023 - December 2023

As a Frontend Trainee, I developed banking dashboards and auth systems under Agile, securing 1st place and successfully leading my first team to deliver high-quality financial software.
